

# 2Way Release Notes - 6.4.2020

---

Backend v1.91 (Backend only release)

(BE) - Backend only change

Indicates changes from previous release notes.

## Improvements - *Backend*

- ▶ **Reports Chat message** - If a chat message is received from a user on a report, a notification is added in the Recent activity feed on the Dashboard. Filter switch added also for Recent activity to allow enabling/disabling of these notification. If they are disabled, a summary of unread messages is displayed. Furthermore, a column has been added in All Reports to show if a reports has unread message. Please find some screenshots below.
- ▶ **Ckeditor** updated to v4.13.1
- ▶ **Adding images** as a thumbnail with content and profile had restrictions on size and dimensions. We have implemented a build in mechanism to reduce file size if excessively large and added crop feature where applicable to reduce nuisance caused when adding an image.

## Fixes

- ▶ Fixed. Editing Destination details on iPad had the "VIEW" button not visible.
- ▶ Fixed. In some cases, notification was received twice.
- ▶ Fixed. Mange/Airline groups. "Can View" was not in alphabetical order.
- ▶ Fixed. Reports/Status messages. The count for each status message didn't decrease when changed.
- ▶ Fixed. Events - Date column format not correct
- ▶ Fixed. Documents. I some cases, documents wouldn't load when ending had .PDF in all capital letters.
- ▶

## Supported operating systems

- ▶ iOS 10 and up
- ▶ Android 5.0 (Lollipop) and up

## Reports Chat message

New "Comments" column added to show if there are unread chat messages.
